Introduction

What is Bluetooth wireless technology?

Bluetooth wireless technology propels you into a new dimension in connectivity.

Bluetooth devices communicate without wires, using built-in radio transceivers that operate on a globally available radio frequency to ensure worldwide compatibility. Your Bluetooth wireless headset can communicate with other Bluetooth devices within a range of approximately 10 meters (33 feet).

How can I use my wireless headset?

Your Wireless Headset equipped with Bluetooth wireless technology lets you connect with other similar equipped devices:

- | Use your phone hands-free
- | Handle incoming and outgoing calls with the headset multifunction control button
- | Use voice activation to make calls.

Handset Features

Please refer to [figure 1](#)

Using your headset

Charging your headset

First-time use: Charge about 3 hours before using the headset. When it is fully charged, the red indicator light will die off.

Recharging: when you see the red indicator light flash and hear high tones beeps through the headset speaker repeated at 20-seconds intervals, the headset battery needs to be recharged.

The rechargeable battery can be charged for about 500 times. The battery can only be used between -10°C and 45°C. If you do not use the headset for long time, please charge the battery every two months. Do not charge the battery longer than 24 hours.

A fully charged headset battery provides approximately up to 8 hours of talk time 250 hours of standby time.

Wearing your headset

Placing the headset on your ear. When you bought the headset, the ear hook was equipped for right ear.

Changing for wear on the left ear Refer to [figure 2](#) and [figure 3](#)

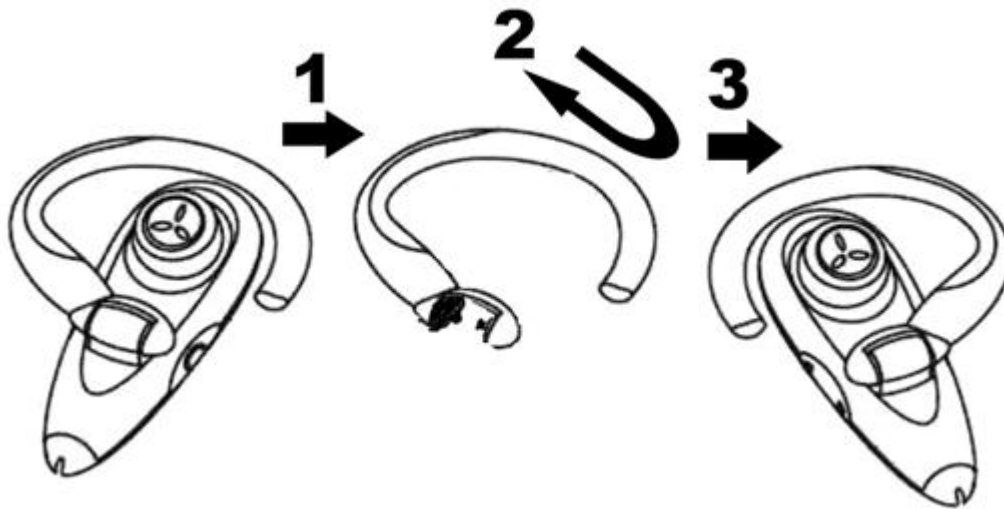

Figure 2

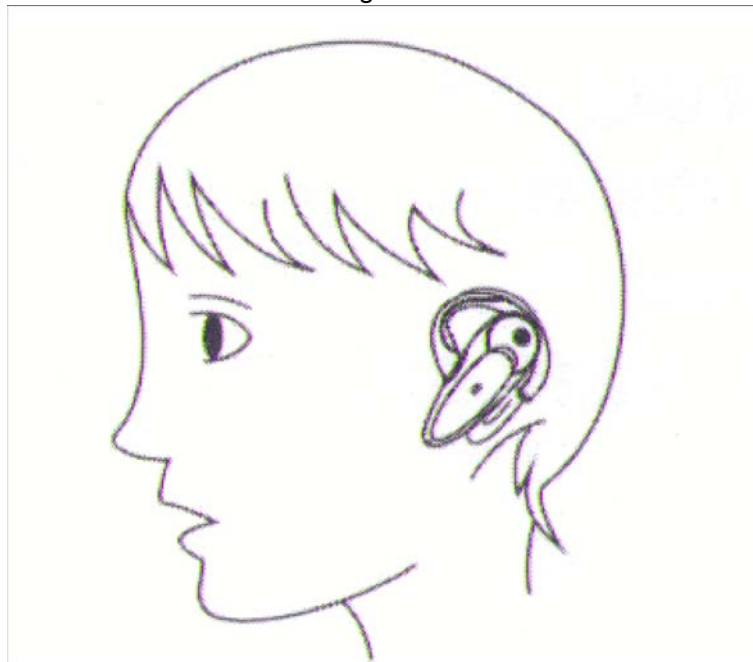

Figure 3

Note: Because the headset is equipped with Volume Orientation Technology, it does not matter whether you wear the headset on the right or left ear. Pressing the Vol+ key always increase the volume and pressing the vol- key always decrease the volume.

Turning on the headset

Turn on the headset: press the MFB button for about 5 seconds. You will hear **two beeps** and the **blue** light flashes.

Pairing your headset and phone

You must pair your headset and phone before you can make a call.

'Pairing' creates a link between devices equipped with Bluetooth wireless technology and allows the phone to remember the headset's unique ID.

Pairing

With the headset and phone in close proximity:

Step 1: Press the **MFB button** for about 8 seconds until the blue and red light flash together.

Please note, after pressing MFB button for about 5 seconds, the blue light flashes. Please do not release the button and keep pressing until the blue and red light flash together, which indicates that the headset is now in pairing mode.

Step 2: Perform a device discovery (for scan) from the phone. For details about device discovery please consult your phone's user guide.

Step 3: Select **H&H-006** in the list of discovered devices and confirm by following the on-screen prompts.

Step 4: When requested by the phone, enter the passkey **0000** and confirm.

If you have not finished the pairing process within 1 minute, please start again from step 1.

Placing and receiving calls

Your headset supports both Hands Free and Headset Profile. Accessing call functions depend on which profile your phone supports.

You can activate call functions for both Hands Free and Headset Profile (Headset on) after connecting the headset with mobile phone according to the following table.

Function	Handsfree Profile Action	Headset Profile Action
Receiving a call	Press MFB button	Press MBF Button
Make a voice dial call	Press MFB button, speak name	Same
Redial last number	Press VOL+/VOL- for two seconds	Not Applicable
End a call	Press MFB button	Press MFB button
Transfer call from Phone to headset	Press MBF button for two seconds	Not Applicable
Transfer call from headset to phone	Press MBF button for two seconds	Not Applicable
Toggle between two calls	Press MFB button	Not Applicable
Reject a call	Press MBF button for two seconds	Not Applicable

Turing off the headset

Turn off the headset: press the MFB button for about 3 seconds. You will hear two beeps and the **red** light flash.
